SUPERIOR PERFORMANCE

The 24b raises the bar higher than ever before when it comes to functionality and fishing. You will be the envy of anglers when you pull up in the shallow water with the 24b with its 12" draft. With the 8'3" beam this boat has more room to move around when fighting the big ones.

FISHABILITY & COMFORT

The oversized front deck allows for a better casting area along with plenty of storage for your fishing gear. The 24b comes standard with a Kevlar hull and carbon fiber sides & deck making it stronger as well as lighter for better fuel efficiency. This traditional West Coast bay boat which has the room of a much larger boat but it will allow you to get where the fish are whether it's in shallow water or deep water fishing for grouper.

SUPERIOR CRAFTSMANSHIP & CONSTRUCTION

Like all other Canyon Bay models, it's easy to tell that the 24b is designed right and built to last. Each boat is constructed using premium materials, such as carbon fiber, Kevlar hull, biaxial laminates, molded fiberglass stringers and a poured ceramic transom. The 24b can be used for many different applications and offers a dry and comfortable ride for its passengers.
